

- Measures the air ionizer efficiency and the offset voltage
- Measures the electrostatic decay time from ± 1000 V to ± 100 V (standard setting)
- Measures the (150 x 150 mm) plate potential with a built-in electrostatic field meter
- Records the measured values in memory
- Plate can be removed in order to apply the high voltage head to the field meter
- High voltage head allows direct voltage measurement of up to 2 kV

Size: 15,2 x 15,2 x 15,2 cm (W x H x D)

Includes: Power supply 230 VAC, ground cord, conductive case, software, user's manual in German and English, calibration certificate

Part Nr.

7100.CPM74

Charged plate monitor CPM74

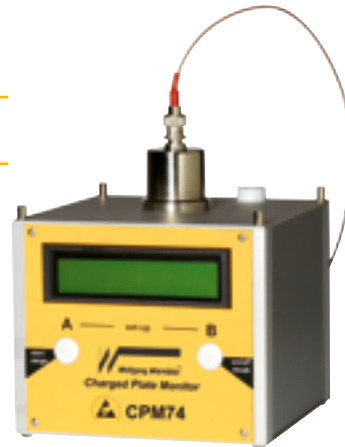

Accessories

Part Nr.

7100.CPM74.HM

High voltage head,
including connecting cable

CPM74 with high voltage head

sample application
