

- Measures the air ionizer efficiency and the offset voltage
- Measures the electrostatic decay time from  $\pm 1000$  V to  $\pm 100$  V (standard setting)
- Measures the (150 x 150 mm) plate potential with a built-in electrostatic field meter
- Records the measured values in memory
- Plate can be removed in order to apply the high voltage head to the field meter
- High voltage head allows direct voltage measurement of up to 2 kV

Size: 15,2 x 15,2 x 15,2 cm (W x H x D)

**Includes:** Power supply 230 VAC, ground cord, conductive case, software, user's manual in German and English, calibration certificate

**Part Nr.**

**7100.CPM74**

Charged plate monitor CPM74

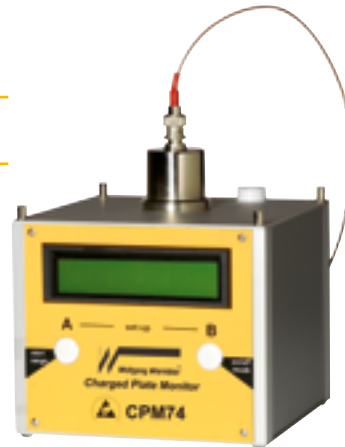

**Accessories**

**Part Nr.**

**7100.CPM74.HM**

High voltage head,  
including connecting cable

CPM74 with high voltage head

sample application
