What's in Soldering Fumes?

The smoke produced while soldering can easily expose one to Hazardous Fumes. Soldering, a process in which heat is used to join two metals together by melting a third metal or solder, produce fumes that can be hazardous to the operators breathing zone.

Metal vapors are formed as solder evaporates and gases are produced as flux evaporates. Metal vapors are released into the air when low melting point alloys are soldered together. Due to rosin fluxes, including resin acid particles, soldering process produces fumes that can cause long-term discomfort & health problems.

The human body exposed to solder fumes directly because the fumes rise vertically during hand soldering practices. Operators are exposed to lead during soldering. If handled incorrectly, lead can cause chronic health effects, such as reproductive problems, digestive problems, memory and concentration problems, and muscle and joint pain.

The health hazards due to common solder components are as below:

Lead: May cause lead poisoning, kidney disease, hypertension, and weight loss. Targets the gastrointestinal tract, nervous system, kidneys and blood. Symptoms include metallic taste in the mouth, nausea, vomiting, headache, cramps, nervousness, and insomnia

Tin: Considered relatively harmless but may generate benign pneumoconiosis, or eye, skin, and respiratory system irritation

Silver: May create throat irritation, blue gray eyes, nasal septum irritation, and gastrointestinal disturbance

Copper: Can produce eye and upper respiratory irritation and metal fume fever. Metal fume fever symptoms include fever, chills, aches, pains, nausea, and dizziness.

That is why you need to come up with a way to eliminate that toxic smoke whenever you are soldering. But here is where the confusion comes in: which one should choose between Fume Extraction System or Fan type Fume Absorber

Which one should you choose between: Fume Extraction System vs Fan type Absorber

The answer to this is simple - Go with the Fume Extraction System. A fan type absorber will just blow around the smoke produced and not filter it completely – You will still breathe the fumes. A Fume Extraction System not only sucks the fumes but it also filters the fumes thus making it an efficient Solder Fume Filtration System. Despite its cost, a soldering Fume Extraction System is way superior and efficient than a soldering fan type absorber.

Filtration Process of Fume Extraction System

Pre-Filter

Filter out larger particles of solder fumes

Middle Filter

Filter out coarse particles of solder fumes and also filter out bacteria, fungi etc.

Main HEPA Filter

Activated carbon filters and filter out all toxic and harmful gases to make the air pure and free from pollutant

Filtration Process of Fan type Fume Absorber

Carbon Activated Filter

Filter out solder fumes partially not completely

Warranty is 12 months from the date of invoice. It excludes any sort of mechanical damage and all consumable parts as Filters, Extraction Arms and Hoods.

on-site services can be provided at extra charges if pre-paid by customer in advance

powerful maintenance-free Brushless Turbine • supplied with all accessories

3-Stage Filters for 99.97% fumes cleaning
Pre-Cut Metal Plate increases life of 3 Filters
Silent operation with low noise < 60 dBA*
Reliable and powerful brushless Turbine

Setting Switches Connector for Speed Control Regulator

Caster wheels for easy & effortless mobility

System Choke Alarm:
When display shows circular movement clockwise plus OFF and system beeps, it means any of Filters needs replacement.

Solder fumes extraction during hand soldering on PCB and Solder Pot tinning

Scope of Supply

- 1xESD Safe Black Colour Main unit
- 2xESD Safe Extraction Arms (75mm dia, 1.0 meter long)
- 2xBench Clamps
- 2xSoft Connection Hose
- 2xSquare Metallic Hoods (180x180mm)
- 1xSpeed Control Regulator
- 5xSpare Pre-Filters

Specifications

- Input Power Supply : 230V/50Hz, 250W
- No of Workplaces : 2
- Stationary Pressure : 3000 Pa
- Maximum Airflow Rate : 240m³/h
- Filtering Efficiency (0.3um) : 99.97%
- Noise Level : <60dB*
- Dimension (LxWxH) (approx) : 470x230x500mm

* at distance of 1 meter & also at typical speed of turbine

Warranty is 12 months from the date of invoice. It excludes any sort of mechanical damage and all consumable parts as Filters, Extraction Arms and Hoods.

on-site services can be provided at extra charges if pre-paid by customer in advance

While the information contained herein in, has been carefully compiled to the best of our knowledge, nothing is intended as representation and warranty on our part; and no statement shall be construed as recommendation to infringe any of existing patents. powerful maintenance-free Brushless Turbine • supplied with all accessories

Features

- Hassle-free easy-to-start operation with all inclusive kit supplied
- Easy-to-manoeuvre positioning of Fumes Extraction Arms
- Reliable & virtually maintenance-free Brushless DC Turbine
- Has low noise (< 60 dBA) in operation continuous running
- Specially designed Filters to remove hazardous gaseous/adhesive substances from fumes
- Low running cost as normally low cost Pre-Filter mainly needs replacement periodically as and when there is choking in fumes extraction
- Readily availability of all spare parts from stock

Length of the Extraction Arm is easily adjustable, as this is made from press-fit type small sections which are easily adjustable in length by selection of these sections as per required length.

FES2-75ESD-TC is a reliable and really effective volume extraction type 2-operators ready-to-use Solder Fume Extraction System. It is designed for continuous and reliable working on production line. Its powerful and maintenance-free brushless turbine combined with electronic speed control, provides clean working environment at low maintenance cost. The electronic Speed Controller regulates air-flow volume continuously.

These ready-to-use Solder Fumes Extraction Systems are fitted with **3-stage Filters**: Pre-Filter, Middle Filter and HEPA/Charcoal Filter. Combination of these Filters cleans polluted air by separating 99.97% contaminated solder fumes. These Systems are designed to use both in industrial and laboratory environment. Only mains input Power Supply is required to operate these systems.

Details of 3-Stage Filters and other Spares used in this Fume Extraction System

2-operators ready-to-use Solder Fumes Extraction System Model FES2-75ESDLC is fitted with **3-stage Filters**: Pre-Filter, Middle Filter and HEPA/Charcoal Filter. Combination of these Filters cleans polluted air by separating 99.9% contaminated solder fumes. This System is designed for use both in industrial & laboratory environment. All it needs is mains input Power Supply only.

- **Metal Plate:** Metal Plate on top to increase the life of Filters It absorbs the heat of the fumes and prolongs the life of Filters
- **Stage I Pre-Filter (F7):** The Pre-Filter filters the bigger size particles for prolonging the life of both Middle and Main Filters.
- **Stage II Middle Filter:** It filters coarse size fume particles to prolong life of expensive HEPA/Charcoal Filter
- **Stage III Main HEPA/Charcoal Filter (H13):** This Filter is a combination of HEPA (filters fine size fume particles) and Activated Charcoal (absorbs harmful gas substances) Filters to provide clean air finally.

Note: These 3 Filters should never be washed nor should be cleaned with compressed air at all.

Warranty is 12 months from the date of invoice. It excludes any sort of mechanical damage and all consumable parts as Filters, Extraction Arms and Hoods.

on-site services can be provided at extra charges if pre-paid by customer in advance
